

Metro Council Financial Transformation Complete

The Board of Directors was recently presented the Annual Report and Audit for 2015. Tremendous progress was made last year with the completion of the reorganization of REGIS marking the last phase of the fiscal transformation. Progress toward the full sustainability of GVMC was completed with our Auditor, Peter Haefner, speaking very highly of the dramatic fiscal process we have made in recent years.

In addition to reorganizing our REGIS staff, in 2015 we implemented the most comprehensive upgrade to our data center in the

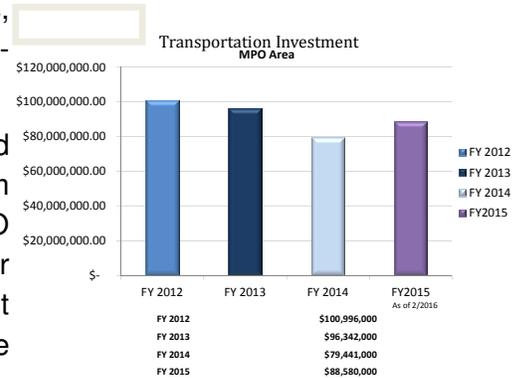

history of REGIS. This reorganization and technical upgrade secures the sustainability for the REGIS collaboration for many years to come.

The year 2015 also saw our Environmental Programs grow significantly with expanded programs, new members and new grant opportunities.

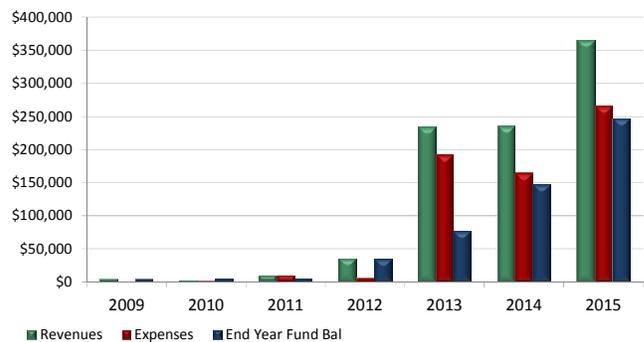

Once again our members worked together to obtain the maximum funding available through the MPO process and saw an increase for the area of \$9 million over last year. This allowed us to finance

124 projects with a total of \$88,580,000.

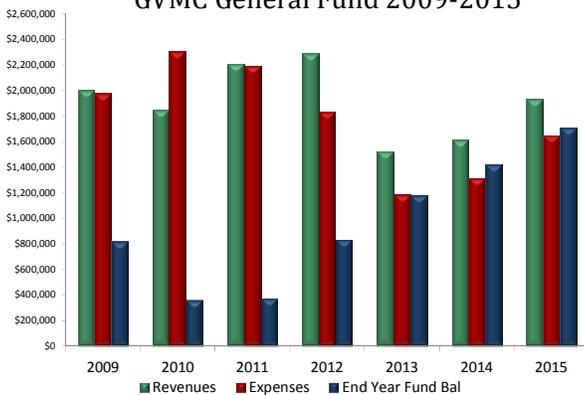

Last year was a great year for GVMC and the Board was pleased with the results of our efforts. Complete information is available at www.gvmc.org.
