

Cemetery Training Outline

Overview

The REGIS Cemetery workshop will introduce the user to the tools and skills needed to explore and maintain cemetery data and records that have been converted to GIS format in REGIS. The workshop will also cover the REGIS public cemetery viewer and how field maps can be created using the GIS.

Who Should Attend

This course is designed for current REGIS users who would like to maintain cemetery records in REGIS. This course assumes the user has attended: RIMS Training and Intermediate GIS (ArcGIS), Part I

Course Length

Course Length:
Approximately 2.5 hours (8:30am to 11:00am)

Offered:

Please visit the REGIS Training page to see when this course is offered next.
