I. ROLL CALL AND INTRODUCTIONS

Conners, Subcommittee Chair, called the March 8, 2022 TPSG Subcommittee meeting to order at 1:00. Those present introduced themselves to the Subcommittee.

Voting Members Present

Kristin Bennett		City of Grand Rapids
Scott Conners <i>(Chair)</i>		City of Walker
Mike DeVries		Grand Rapids Charter Township
Rick DeVries		City of Grand Rapids
Shay Gallagher		Village of Sparta
Art Green		MDOT - GRTSC
Wayne Harrall		Kent County
Russ Henckel		City of Wyoming
Dennis Kent	<i>Proxy for</i>	MDOT- Grand Region
Jim Kirkwood		City of Kentwood
Doug LaFave		City of East Grand Rapids
Brett Laughlin		Ottawa County Road Commission
Clint Nemeth		GFIAA
Jeff Oonk	<i>Proxy for Nicole Hofert</i>	City of Wyoming
Terry Schweitzer		City of Wyoming
Rick Sprague		City of Kentwood
Dan Strikwerda		Kent County Road Commission
Kevin Wisselink		City of Hudsonville
		ITP - The Rapid

Staff and Non-Voting Guests Present

Sue Becker	Alpine Township
Brad Doane	GVMC Staff
Mara Gericke	GVMC Staff
Laurel Joseph	GVMC Staff
Mike Zonyk	GVMC Staff

Voting Members Not Present

Mike Burns	City of Lowell
Adam Elenbaas	Allendale Township
Nicole Hofert	City of Wyoming
Tyler Kent	MDOT
Bill LaRose	City of Cedar Springs
Robert Miller	City of Hudsonville
Liz Schelling	ITP – The Rapid
Charlie Sundblad	City of Grandville

Jeff Thornton
Phil Vincent
Luke Walters
Steve Warren
Member Awaiting Appointment

Village of Caledonia
City of Rockford
MDOT
Kent County Road Commission
Village of Sand Lake

II. APPROVAL OF MINUTES

Referring to Item II: Attachment A, Connors entertained a motion to approve the March 2, 2022, TPSG Subcommittee meeting minutes.

MOTION by Laughlin, SUPPORT by M. DeVries, to approve the March 2, 2022 TPSG Subcommittee meeting minutes as presented. MOTION CARRIED UNANIMOUSLY.

III. OPPORTUNITY FOR PUBLIC COMMENT

No public comments.

IV. ADJUSTMENTS TO DRAFT PROGRAM OF PROJECTS FOR FY2023-2026 TIP

Referring to Item IV: Attachment A,

2023

Joseph mentioned one miscalculation on STP-Urban funding that was allocated at the March 2, 2022 meeting. The City of Grand Rapids has an Advance Construct Conversion listed in 2023, which is being paid back that year. The correction being made changes federal funding to 100% instead of 81.85% Adjustments were made to get back into fiscal constraint with administrative modifications.

TAP

Joseph gave an update on the FY2023 TAP funding and asked the Subcommittee whether or not they would like to fund the currently programmed TAP projects at 80/20 to maximize federal funding. This was recommended due to the timeline of the TAP application process. The Subcommittee agreed to this for FY2023, however, the TAP funding discussion will continue for the remaining years. Joseph asked the Subcommittee whether any recommendations that come from the upcoming combined Nonmotorized / TPSG Subcommittee meeting should come back to the group ahead of the May Technical Committee meeting. The Subcommittee agreed to bring the recommendations straight to the May Technical Committee meeting rather than schedule another TPSG meeting.

Joseph presented the new FY2023 CMAQ / CRP funding based off of the recommendation made at the March 2, 2022 TPSG Subcommittee meeting to replace the lowered CMAQ funding with CRP funding. Harrall asked about the project criteria for CRP funding. Joseph noted that guidance lists projects as eligible if they are CMAQ eligible, as long as they do not add new capacity. D. Kent added

that a through lane could not be added, however, turn lanes, etc. could be eligible. As of now, there is no committee for this funding source similar to the one formed for CMAQ funding decisions.

2024

CMAQ and CRP

Joseph noted that CMAQ funding will be reduced by \$712,721. It was recommended that this loss is supplemented with CRP funds. This leaves \$558,279 to be programmed. Connors recommended adding the funding to the City of Walker roundabout project at Center Dr at Weatherford Dr, east of Alpine Ave. It was suggested that more time be given to gather estimates for FY2025 and 2026 projects. The Subcommittee recommended that the funding be allocated to the City of Walker roundabout project.

TAP

\$850,742 in TAP funding remains unprogrammed. Joseph stated that the Kent County Road Commission Argo Ave project is working with Safe Routes to School, and due to the timeline, may need to be moved to FY2025. If so, this leaves a significant amount of funding to be put towards the Grand Rapids Township Crahen Valley Park Trail project.

Discussion ensued.

The Subcommittee recommended adding the full amount of FY2024 TAP funding to the Crahen Valley Park Trail Project and moving the Argo Avenue project from FY2024 to FY2025.

MOTION by Laughlin, SUPPORT by Harrall to approve the FY2024 Adjustments as discussed to the Draft Program of Projects. MOTION CARRIED UNANIMOUSLY.

2025

STP-Urban

It was suggested that the remaining \$748,000 is absorbed into currently programmed projects to get the projects as close to 80/20 as possible.

STP-Flex-Kent Co.

\$99,000 remains unprogrammed. It was suggested this funding be used for the City of Grand Rapids Ann St project to extend the limits.

STP-Flex-TMA

This funding includes former NHPP funding and totals \$373,000. It was previously recommended to go to the Kent County Road Commission West River Dr project. This is a FY2024 project with Advance Construct Conversion in FY2025.

STP-Rural

\$74,000 in STP-Rural funding is available. This can be absorbed into the Lincoln Lake Ave project, with the estimated project cost being raised from \$1.2 million to \$1.4 million.

EDC

\$140,000 remains unprogrammed with all projects maxed out at an 80/20 split. This funding can either be rolled over to a future year or added to a new project. A follow up is needed on allocating this funding.

CMAQ and CRP

Joseph confirmed with the Subcommittee that they would like to move forward with supplementing the lost \$712,721 in CMAQ funding with CRP, and leave the remaining \$558,279 unprogrammed for now. The Subcommittee asked for additional time to package together funding estimates and project proposals. Joseph asked that decisions are finalized at the upcoming combined Nonmotorized / TPSG Subcommittee meeting.

A discussion about proposed projects to receive this funding ensued.

TAP

It was suggested that funding is added to the City of Grand Rapids Fulton St project to bring it up to the full 70/30 split.

MOTION by M. DeVries, SUPPORT by Schweitzer to approve the FY2025 TAP recommendation and FY2025 Adjustments as discussed to the Draft Program of Projects. MOTION CARRIED UNANIMOUSLY.

2026

STP-Urban

It was recommended that the \$773,000 be absorbed into currently programmed projects to get most to a 20% local match after an adjustment to the City of Walker Alpine Ave project to increase the total budget to \$1.2 million.

STP-Flex TMA

\$382,000 is available to program. Laughlin suggested using this funding to add two Ottawa County Road Commission projects back from the illustrative list to the project list. These projects, 12th Ave and 18th Ave, will utilize the full \$382,000 available.

STP-Flex-Kent Co.

It was recommended the \$102,000 be absorbed into the Kent County Road Commission Myers Lake Ave project after a new cost estimate was made.

Rural

The \$76,000 can be absorbed into the currently programmed Kent County Road Commission Lincoln Lake Ave project.

EDC

There is approximately \$555,000 in FY2026 funding and additional carryover from previous years available. The Subcommittee agreed to allocate the \$49,285 to the Kent County Road Commission 10 Mile Rd project with the remainder used to add a project from the illustrative list.

Discussion about project eligibility ensued.

CMAQ and CRP

It was suggested that the lost CMAQ funding is supplemented with CRP, leaving \$644,281 unprogrammed.

The 36th and Schaffer roundabout project cost estimate is up to \$1.4 million. It was suggested that these funds could be used on this project to get it to an 80/20 split. Joseph will report on what is left at the combined Nonmotorized / TPSG Subcommittee meeting.

TAP

Decisions will be made at the combined Nonmotorized / TPSG Subcommittee meeting in April. Joseph will increase all projects to a 70/30 split and report back on what is left to program.

MOTION by K. Bennett, SUPPORT by LaFave to approve the FY2026 Adjustments as discussed to the Draft Program of Projects. MOTION CARRIED UNANIMOUSLY.

V. OTHER BUSINESS

VI. **ADJOURNMENT**

Conners, Subcommittee Chair, adjourned the meeting at 2:11 p.m.

MEMORANDUM

DATE: April 5, 2022

TO: TPSG Subcommittee and Nonmotorized Committee

FROM: Laurel Joseph, Director of Transportation Planning

RE: **Adjustments to FY2023-2026 Draft TIP Funding and Project Lists**

In February, GVMC received updated revenue targets for FY2023-2026 based on the new Infrastructure Investment and Jobs Act (IIJA) signed into law in November 2021. On March 2 and 8, TPSG met to begin making recommendations for changes to the draft FY2023-2026 TIP list to align with these new targets. At their March 8 meeting it was recommended to have a combined meeting with the Nonmotorized Committee to facilitate a broader discussion regarding TAP and the new Carbon Reduction Program (CRP) funding, as well as develop programming recommendations for the remaining TAP and CRP funds. Staff is requesting members come prepared with proposals for the group to evaluate and discuss with the goal of fully programming the available funds.

Below is a summary table for TAP and CRP funding for FY2023-2026.

Year	Funding Source	Allocation	Programmed	Remaining
2023	Carbon Reduction	\$1,246,000	\$1,246,000	\$0
	TAP	\$1,446,064	\$713,420	\$732,644
2024	Carbon Reduction	\$1,271,000	\$1,271,000	\$0
	TAP	\$1,474,985	\$1,474,985	\$0
2025	Carbon Reduction	\$1,297,000	\$696,808	\$600,192
	TAP	\$1,504,485	\$732,895	\$771,590
2026	Carbon Reduction	\$1,323,000	\$1,120,000	\$203,000
	TAP	\$1,534,575	\$1,050,000	\$484,575

In addition to the funding listed above, it is anticipated that GVMC will have about \$607,000 in carryover from new FY2022 TAP allocation that may also be utilized.

Also attached for reference are the draft FY2023-2026 project lists (programmed and illustrative). Note that the Nonmotorized needs list combines the 2019 list with additional projects that were submitted during this TIP development process. Staff scored all projects according to the updated project evaluation criteria (also attached), but due to timing, were not able to score the Project Support, Readiness, and Maintenance category, so no points have been awarded to any project for that category at this time. Members proposing projects for funding may bring information related to project support, etc. for the committee to consider at the meeting. Additionally, for reference related to a broader discussion surrounding TAP and CRP, the current Policies and Practices for Programming Projects document starts on page 27 of the membership binder found [here](#).

If you have any questions, please do not hesitate to contact me at (616) 776-7610.

GVMC Nonmotorized Project Evaluation Criteria

Updated September 2021

Study Process and Project Evaluation Criteria

In July 2013, the Nonmotorized Committee created a new evaluation process for projects submitted for inclusion into the 2014 Nonmotorized Plan. The new priority process involved the rating of five major components: mode shift, connectivity/continuity, safety/ADA, regional vs. local facility, and high use/social equity. The rating system was designed to have minimal personal influence by the rater, with the physical location of the project being the primary determining factor for each project's score.

On August 31, 2021 the Nonmotorized Committee met to discuss updates to the evaluation criteria to align with federal performance measures and incorporate additional factors of value to the competitive scoring process for programming regional Transportation Alternatives (TAP) funds. Each factor has the possibility of 0 to 3 points awarded relating to low, medium, and high, with a minimum of 0 and maximum of 21 points awarded for each project. The updated rating factors are as follows along with the methodology for determining their scores.

This scoring system is to be used as a guide to show what the MPO's priorities might be for funding proposed projects with federal dollars in the future in alignment with federal requirements for a competitive selection process for projects funded with federal TAP funding.

Evaluation Criteria

Mode Shift

Measurable changes in bicycling, walking trips, and/or transit ridership are likely based on the geographic proximity to trip attractors, trip generators and transit bus stops.

Methodology

Three points are awarded for each project that would display a measurable likelihood of mode shift. Each project is awarded a point for being near trip attractors, trip generators, and transit.

For measuring trip attractors, employment statistics are used to determine what projects are close to retail, education services, health care, arts, entertainment, recreation, and food services. Point employment values are aggregated using a point density analysis in GIS that calculates a magnitude per unit area from point features that fall within a neighborhood around each cell. In other words, the higher concentration of services within a specified distance from any given location, the greater the value is. This calculation is used to paint a picture for the whole MPO area. Projects located in an area with medium to high density of attractors are awarded a point.

Trip generators are traditionally factors of population and can represent the possibility of latent demand. Census block centroids are used to create a point density analysis for population in GIS to find the highest concentration of people, using a similar methodology to that which was used to determine trip attractors. Projects located in an area with medium to high density of generators are awarded a point.

Although a quarter mile is the standard for the average distance people are willing to walk to a bus stop it is not a hard boundary. However, for the purpose of giving each project a rating based on proximity to transit, this distance is used to define whether the project receives a point for transit. Projects that may bridge a gap for bus access and/or be near a bus stop are awarded a point.

Connectivity/Continuity

The project will fill a gap in relation to existing facilities and allow for the continuous flow of travel for a specific type of nonmotorized travel.

Methodology

Three points are awarded for each project that is bridging a gap or removing a current barrier that exists. A point is awarded if existing facilities are found on both sides of the proposed project – these may include sidewalks, neighborhood bikeway networks, multiuse paths, etc. If the project is a small piece of a proposed alignment and connected by proposed facilities on either side as part of a larger connector to existing facilities it would still be awarded a point for this rule. Another point award occurs if the facility being proposed services both bicyclists and pedestrians if nothing currently exists for either mode along the proposed facility/street alignment. A final point is awarded if the proposed project allowed for the continuous flow of travel for nonmotorized users.

Safety

The project will eliminate conflict points between vehicles and forms of nonmotorized travel. This should minimize the incidents of crashes, injuries, and fatalities.

Methodology

Three points are awarded for each project that address safety based on the following characteristics. A point density GIS analysis was created using bicycle/pedestrian safety statistics provided from the State of Michigan Police Division. This provided a measure of crash rate and severity over the past ten years. If the project falls in an area of moderate to high crashes involving nonmotorized travelers, it receives a point. A project identified within a half mile of a past pedestrian- or bicycle-related fatality or serious injury is awarded a point. Finally, if the proposed facility will be separated from vehicle traffic (through barriers and/or space), it will be awarded a point.

ADA/Accessibility

The project will improve the nonmotorized network conditions for users with disabilities and/or the elderly.

Methodology

All projects must address applicable ADA requirements; however, three points will be awarded to projects that address ADA/accessibility based on the following characteristics. A point is awarded to each project that improves ADA accessibility for facilities in the nonmotorized network. Based on the most recent available census information, a point is awarded to each project that is located in an area with higher than the regional average of persons 65 years and older, and an additional point if that project is located in an area with higher than the regional average of persons with disabilities.

Regional vs. Local Facility

The project allows for the continuous flow of travel for users, and transportation impacts are regional or multi-jurisdictional.

Methodology

Three points are awarded based on the regional impact of the project proposed. If the project is a connection that bridges a gap for a populous from a localized system to access a more regional network that extends into other jurisdictions, it is awarded a point. If the project allows for the continuous flow of travel between jurisdictions, it is awarded another point. If the project has been identified as a multi-jurisdictional need and has formally received such support, it is awarded a final point.

Environmental Justice and Sensitive Environmental Resources

The project should provide transportation for traditionally underserved communities and improve/mitigate negative impacts on sensitive environmental resources.

Methodology

Three points are awarded for each project that serves a population center within an environmental justice (EJ) area and incorporates elements to mitigate negative impacts on environmentally sensitive resources. Using the GIS analysis from the most recent Metropolitan Transportation Plan identifying MPO EJ areas each project that falls within an EJ area will receive two points. Each project that includes elements that will improve or mitigate negative impacts on sensitive environmental resources (protecting established vegetation/habitat, improving air quality, implementing sediment and erosion control techniques, protecting water quality, etc.) will receive an additional point.

Project Support, Readiness, and Maintenance

The project should demonstrate local support, an ability to be constructed according to applicable federal and state standards within the estimated budget and timeline, and include a plan for continued maintenance.

Methodology

Three points may be awarded to each project in this category. Each project that is included in a locally developed and approved plan (including appropriate public input/involvement) will be awarded one point. Each project that has gone through a “feasibility study” process to ensure that all federal and state design standards can be met within the proposed project alignment with an accurate estimated budget (accounting for retaining walls, boardwalk, etc.) will be given one point. Each project that has an associated plan for routine and periodic maintenance (snow plowing, cleaning, structural issues, etc.) will receive one additional point.
