MTP Investment Priorities

On Thursday, October 17, the MTP Steering Committee met and affirmed the following priorities for the 2045 MTP:

Priority	Rationale
System Preservation (includes bridge*)	<ul style="list-style-type: none"> • <i>Preserve the System</i> is a goal of the 2045 MTP. • Maintaining the system in a state of good repair (pavement and bridge) is a federal performance measure. GVMC has supported the State’s targets to show positive movement in this area. • Our infrastructure is crumbling, and as repairs are delayed, they become more costly. • Poor pavement condition creates a safety issue for all users of the transportation system. • In order to achieve a PASER rating of 5 (fair condition), we would need a 50% increase in the annual budget by the year 2030. • Our public survey showed that the public’s top priority is improving pavement condition. • *Bridge rehabilitation activities are determined by the state and the locals.
Congestion Management	<ul style="list-style-type: none"> • <i>Enhance Safety and Reduce Congestion</i> is a goal of the 2045 MTP. • Increasing the percentage of the person-miles traveled on the interstate and non-interstate NHS that are reliable is a federal performance measure, and GVMC supported the State’s targets to show positive movement in this area. • Improving the Truck Travel Time Reliability (TTTR) Index is a federal performance measure, and GVMC supported the State’s targets to show positive movement in this area. • Not all busy roadways can be widened, so as population grows, promoting a transportation mode shift from a single occupancy vehicles (SOV) to transit or active modes of transportation would be beneficial in reducing congestion. • Based on the deficiency analysis, there is \$1.02 - \$1.52 billion in identified need to improve congestion in the GVMC region • Our public survey showed that the public’s second highest priority was using technology to reduce traffic congestion and delays, and the public’s third highest priority was widening busy roads and interchanges.
Nonmotorized	<ul style="list-style-type: none"> • <i>Further Develop an Efficient Multimodal System</i> is a goal of the 2045 MTP. • <i>Ensure Equity, Access and Mobility</i> is a goal of the 2045 MTP.

	<ul style="list-style-type: none"> • There is \$80 million in unfunded need for nonmotorized projects in the GVMC region. • Shifting toward nonmotorized modes of transportation can help alleviate congestion.
Safety	<ul style="list-style-type: none"> • <i>Enhance Safety and Reduce Congestion</i> is a goal of the 2045 MTP. • Reducing the number and rate of fatalities and serious injuries and nonmotorized fatalities and serious injuries on all public roads is a federal performance measure, and GVMC supported the state's targets to show positive movement in this area.
Transit	<ul style="list-style-type: none"> • <i>Further Develop an Efficient Multimodal System</i> is a goal of the 2045 MTP. • Transit asset management is a federal performance measure. • Increasing transit and rideshare usage means less cars on the road and reduced congestion. • Our public survey showed that the public's fourth highest priority is enhancing transit service.

Funding Sources

The MTP Steering Committee agreed to fund these priorities in the following ways:
